BOWYER-SINGLETON AWARDED STATE ROAD 528 AIRPORT TOLL PLAZA CONVERSION PROJECT

Orlando, Fla. (August 13, 2010) – Bowyer-Singleton, one of Florida's leading civil engineering and surveying firms, was recently awarded preliminary engineering and final design services for the SR 528 Airport Toll Plaza Conversion Project by the Orlando-Orange County Expressway Authority. The project consists of replacing the mainline plaza with a new split-plaza configuration, equipped with both cash and express lanes. Services include Roadway Design, Bridge Design, Maintenance of Traffic, Signing & Pavement Marking and Surveying. This project has an 18-month schedule, with notice to proceed in August 2010. Bowyer-Singleton's management team for the SR 528 project includes Kevin Knudsen, Project Manager, Don Hammack, Assistant Project Manager, and Dan Christie, Senior Roadway Engineer.

Bowyer-Singleton & Associates, Inc., established in Orlando in 1972, provides expert services in Civil Engineering, Transportation Engineering, Environmental Sciences and Surveying & Mapping to transportation agencies, governmental agencies, land developers, engineering firms, and building and property owners throughout Florida. The firm is headquartered in Orlando, with regional offices in DeLand, Ocala, Jacksonville and the Tampa Bay area.
